

ENCRYPTION SEMINAR INVITATION

(This PDF contains four pages including this introduction)

The client's original theme for this piece was "built in, not bolted on" which was a reference to Sun's encryption technology having evolved from many years of experience in the field. The client wanted to explore a different theme and the cactus, with its natural defense mechanisms, seemed to resonate with them. The client wrote the headlines in this piece to round out the concept.

See the following pages for invitation highlights >>

STORAGETEK™

DATA SECURITY

ADDRESSING A PRICKLY PROBLEM

**Join Sun Microsystems for
an interactive discussion on
data encryption with IDC.**

Wednesday, June 7, 2006
Hilton Frontenac
St. Louis, Missouri

HOW DO YOU DEVELOP ADEQUATE DEFENSES?

Even in the most secure locations, information protection can be a prickly problem. And if data gets in the wrong hands, it can result in big problems — such as fines, loss of revenue, and loss of customer confidence.

Get your company's data security plans put together now, not later. Come participate in an interactive discussion on data encryption, featuring:

John McArthur, IDC Group Vice President and General Manager.

The key topics we'll discuss:

- > What data to encrypt
- > Where to encrypt your data
- > How to manage encryption
- > Key management structures
- > Lost or damaged keys
- > Encryption budget concerns

Seating is limited.
Make your reservations now.

Register today at
www.sunstoragetek2006.com/stlouis
or call 1-800-786-7835 Ext: St. Louis

You can also sign up for an optional non-disclosure meeting and lunch where we will be happy to talk about Sun's encryption plans in more depth.

If you have any questions or feedback, please send a message to julianne.raedeke@sun.com.

WHERE

St. Louis, Missouri,
Wednesday, June 7, 2006
8 a.m. – 1 p.m.
The Hilton Frontenac
1335 South Lindbergh Boulevard
